Exports

Merchandise Trade

1971-1973

This report replaces Volume II of Trade of Canada - Exports. Recent innovations in photocomposition have made it possible to re-arrange the previous contents of this report and to add new tables so as to provide users with a broader statistical coverage. For instance, the present version incorporates mode of transport statistics formerly published separately in "Exports by Mode of Transport", catalogue 65-206 (the last issue of which covered data for the calendar year 1972). In addition, tables 6 and 7 present merchandise exports to U.S.A. cross classified by U.S. Census Sub-divisions.

The relationships between the contents of the exports monthly, quarterly and annual publications are summarized on the following page.

Exportations

Commerce de marchandises

1971-1973

Le présent bulletin remplace le Volume II, Commerce du Canada, Exportations. Les innovations récentes dans le domaine de la photocomposition ont rendu possible la réorganisation du contenu précédent de ce bulletin de même que l'addition de nouveaux tableaux, permettant au lecteur d'obtenir des renseignements plus complets sur les exportations canadiennes. Entre autres, le nouveau bulletin présente des données sur les exportations par modes de transport, données qui jusqu'à maintenant étaient publiées séparément dans le Catalogue 65-206, "Exportations par Mode de Transport". (Le dernier numéro de ce dernier contenait les statistiques pour l'année 1972). En outre, les tableaux 6 et 7 ajoutent une ventilation des exportations vers les Etats-Unis par Sous-division du Recensement de ce pays.

Vous trouverez à la page suivante un tableau comparatif des diverses publications ayant trait aux exportations canadiennes.

## Annual Classification Changes and Year to Year Statistical Comparability

The purpose of these notes is to describe the measures taken to provide for year to year comparability between classes and to outline the reasons for commodity classification changes. In January each year the Export Commodity Classification (X.C.C.) is revised and a number of changes are introduced. These changes take several forms:

1. Certain classes are re-numbered, largely to bring the XCC in line with the Standard Commodity Classification (SCC) or to provide for future expansion of the classification, e.g. 1972 class 79-26 became class 72-26 in January 1973.

2. A number of new classes are introduced to permit more precise definition of major commodities moving in trade. This is done by splitting existing classes into one or more new classes, e.g. class 1-70 was split into classes 1-45 and 1-75 in January 1973.

3. Occasionally, where the volume of trade does not warrant separate classification, classes are combined with other classes or become part of a group residual (n.e.s.) class, e.g. 1972 classes 900-14 and 900-19 were combined in January 1973 to form a new class 901-99.

The commodity classification therefore evolves to reflect the changing composition of Canada's international trade and to better meet the requirements of users. An unavoidable by-product of this process is that when the content or numerical designation of commodity classes change it is not always possible to provide, in the framework of a report, comparable data for the previous year's trade.

## Classification annuelle des modifications et comparabilité statistique d'année en année

Ces notes ont pour but de décrire les mesures prises pour assurer une comparabilité annuelle entre les classes et d'exposer les raisons qui ont motivé les modifications apportées à la classification des marchandises. On revise la classification des marchandises d'exportation en janvier de chaque année et on y introduit un certain nombre de modifications. Voici les genres de modifications apportées:

1. Certaines classes sont renumérotées, principalement pour rendre la classification des marchandises d'exportation conforme à la Standard Commodity Classification (SCC) ou pour permettre un élargissement subséquent de la classification; p. ex. la classe 79-26 de 1972 est devenue la classe 72-26 en janvier 1973.

2. On introduit un certain nombre de nouvelles classes pour permettre une définition plus précise des principales marchandises vendues sur le marché. Pour ce faire, on divise une classe existante en une ou plusieurs nouvelles classes; p. ex. la classe 1-70 a été divisée en deux classes en janvier 1973: 1-45 et 1-75.

3. Parfois, lorsque le volume du commerce ne justifie pas une classification séparée, certaines classes sont intégrées à d'autres classes ou annexées à la classe résiduelle (n.d.a.) d' un groupe; p. ex. les classes 900-14 et 900-19 de 1972 ont été fusionnées en janvier 1973 pour former une nouvelle classe, 901-99.

Par conséquent, la classification des marchandises évolue afin de tenir compte de la composition changeante du commerce international du Canada et de mieux répondre aux exigences des utilisateurs. Ce procédé comporte un inconvénient inévitable: lorsque le contenu ou la numérotation des classes de marchandises est modifiée, il n'est pas toujours possible de fournir, dans le cadre d'un rapport, les données correspondantes pour le commerce de l'année précédente.

In order to eliminate this problem the following measures were adopted:

1. A class for which the code changed in 1972 or 1973 is shown with its current code whether,

   a) it retained the same content, or

   b) changed in content.

2. Where a previously existing class was split into several, in either 1972 or 1973 the newly created classes were,

   a) recombined and shown under the code of the previous class, or under the most appropriate current code;

   b) shown under the current codes where it was possible to make the split retroactive;

   c) left unchanged when a retroactive split was not feasible and where the new codes were in existence for the two latest years.

3. Where previously existing classes were combined into one, in either 1972 or 1973, the data are shown under the current code.

4. Where changes in class definition and content made it impossible to achieve comparability over time for any of the specific classes involved the commodities concerned were:

   a) aggregated for each of the 3 years, combined with the appropriate residual class and shown under its code, e.g. class 514-39;

   b) aggregated for each of the 3 years and shown under a "dummy" class code, e.g. class 661-19;

   c) left unchanged where none of the above alternatives was feasible.

Afin d'éliminer ce problème, nous avons adopté les mesures suivantes:

1. Une classe dont le code a été modifié en 1972 ou 1973 est indiquée avec son code actuel,

   a) que son contenu soit le même, ou

   b) qu'il soit différent.

2. Lorsqu'une classe déjà existante a été divisée en plusieurs classes, que ce soit en 1972 ou 1973 les nouvelles classes crées ont été,

   a) refusionnées et inscrites sous le code de l'ancienne classe, ou sous le code courant le plus approprié;

   b) inscrites sous les codes courants, lorsqu'il était possible de donner à la division un caractère rétroactif;

   c) Laissées intactes lorsqu'une division à effet rétroactif était impossible et que les nouveaux codes existaient depuis les deux dernières années.

3. Lorsque des classes déjà existantes ont été fusionnées en une seule, que ce soit en 1972 ou 1973, les données figurent sous le code courant.

4. Lorsque les modifications apportées à la définition ou au contenu d'une classe ne permettaient pas la comparabilité dans le temps pour l'une ou l'autre de ces classes, les marchandises visées étaient:

   a) réunies pour chacune des trois années, intégrées à la classe résiduelle appropriée et inscrites sous le code de cette classe, p. ex. la classe 514-39;

   b) réunies pour chacune des trois années et inscrites sous un code de classe fictif, p. ex. la classe 661-19;

   c) laissées intactes lorsque ni l'une ni l'autre des deux solutions précédentes n'étaient possibles.

5. Where only class content changed, the original class code was retained.

In some instances units of quantity are changed as part of a continuing program to standardize the unit in the various economic statistics published by Statistics Canada. Where such changes took place, quantities were converted to a unit common to all the periods covered by this report.

Users should note that the equivalence table shown below is presented in the sequence of the publication code adopted for this report. To that extent the sequence of any of the classifications used in the period 1971-73 is not respected. Besides, any class in existence during that period may be shown in several places in the equivalence table.

In the table below, the number appearing in the NOTE column refers to the type of measure adopted to ensure comparability.

5. Si les modifications ne visaient que le contenu d'une classe, on conservait le code de classe initial.

Il arrive que des unités de quantité soient modifiées dans le cadre d'un programme continu pour normaliser l'unité de diverses statistiques économiques publiées par Statistique Canada. Dans ce cas, les quantités étaient converties en unités communes à toutes les périodes couvertes par ce rapport.

Les utilisateurs doivent prendre note que le tableau d'équivalence ci-après est présenté dans l'ordre du code de publication adopté pour ce rapport, de sorte qu'on ne tient pas compte de l'ordre des classifications utilisées pour la période 1971-73. De plus, il est possible que les classes utilisées au cours de cette période apparaissent à plusieurs endroits dans le tableau d'équivalence.

Dans le tableau ci-après, le chiffre apparaissant dans la colonne intitulée NOTE renvoie au genre de mesure adoptée pour assurer la comparabilité.

1. **Source of Data:** Export documents collected by Canada Customs are the basic source of export statistics, except for data on electricity, crude petroleum and natural gas exported by pipeline. Electricity exports are reported by the exporting firms through the National Energy Board, crude petroleum and natural gas exported by pipeline are reported by companies directly to Statistics Canada.

2. **Coverage:**

   a. **Domestic Exports:** Statistics of domestic exports include both goods which are wholly produced in Canada and goods previously included in import statistics which have since been changed in form by further processing and then exported.

   b. **Re-Exports:** Statistics of re-exports include only goods previously included in import statistics which are exported from Canada in the same form as when imported. Minor operations such as sorting or blending are not considered as changing the condition of imported goods.

   c. **Total Exports:** These statistics are the sum of a. and b. above.

   d. **Exclusions:** The following commodity movements are excluded from export statistics (being however recorded separately as Special Transaction-Non-trade in Table 5): gold and gold products where the value of the gold content is 80 per cent or more of the total value, including coin; settlers' effects; private donations and gifts; identifiable tourist purchases; goods shipped to Canadian diplomatic or military personnel abroad or by foreign representatives in Canada; temporary exports for exhibition or competition, including films for processing. Bunker supplies and ships' stores sold to foreign vessels or aircraft in Canada, temporary exports (other than contractors' equipment shown under commodity code 970-20) and goods merely moving in transit through Canadian territory are not reflected in any of the statistics.

3. **Classification:** Commodities are classified to the *Export Commodity Classification* (XCC), which is based on the Standard Commodity Classification (cf. Cat. 12-502, Statistics Canada). Full descriptions and a definition of contents of each commodity code in the XCC are provided in Export Commodity Classifications, Vols. I, II, III (cf. Cat. 12-521, 12-522 and 12-523, Statistics Canada).

4. **Country and area of destination:** Exports are classified to the country to which they are consigned at the time the goods leave Canada, i.e. to the furthest known destination. Statistics are compiled and presented for the individual countries listed on page VIII of this report. Countries are arranged primarily according to geographical location, but they are also grouped by affiliation to trade blocs and by tariff arrangements (e.g. E.E.C. and Commonwealth and preferential countries). In the statistics shown in this report *European Economic Community excludes Denmark, Ireland and the United Kingdom, new members from January 1, 1973.*

1. **Source des données:** La statistique des exportations se fonde principalement sur les documents d'exportation recueillis par les Douanes canadiennes, sauf dans le cas des données sur l'électricité et le pétrole brut et le gaz naturel exportés par oléoduc. Les rapports sur les exportations d'électricité sont fournis par les entreprises exportatrices par l'intermédiaire de l'Office national d'énergie, tandis que les compagnies exportatrices de pétrole brut et de gaz naturel par oléoduc fournissent directement leurs rapports à Statistique Canada.

2. **Couverture:**

   a. **Exportations nationales:** La statistique des exportations nationales comprend les marchandises entièrement produites ou fabriquées au Canada de même que les marchandises précédemment comptées dans les importations et que l'on a transformées de nouveau puis exportées.

   b. **Réexportations:** La statistique des réexportations ne comprend que les marchandises précédemment comptées dans la statistique des importations et qui sont exportées du Canada dans l'état où elles étaient lors de leur importation. Les manipulations secondaires telles que le triage ou l'assemblage ne modifient pas l'état des marchandises importées.

   c. **Total des exportations:** Ces statistiques correspondent au total des valeurs a. et b. ci-dessus.

   d. **Exclusions:** Les mouvements de marchandises suivants sont exclus de la statistique des exportations (ils sont toutefois classés séparément comme transactions spéciales-hors commerce dans le tableau 5): l'or et les articles en or dont la valeur de la teneur en or représente 80 pour cent ou plus de la valeur totale, y compris la monnaie; les effets d'immigrants; les dons et cadeaux privés; les achats identifiables des touristes; les marchandises expédiées aux diplomates ou militaires canadiens affectés à l'étranger ou par les diplomates étrangers au Canada; les exportations provisoires pour les expositions ou les concours, y compris les films exportés en vue de leur développement. Les approvisionnements de soute et de bord vendus aux navires et avions étrangers au Canada, les exportations provisoires (autres que le matériel des entrepreneurs, qui apparaît sous le code des produits no 970-20) et les marchandises qui séjournent temporairement en transit en territoire canadien, ne figurent dans aucune statistique.

3. **Classification:** Les marchandises sont classées dans la *Classification des marchandises d'exportation* (X qui est basée sur la *Classification type des marchandises* (cf. catalogue no. 12-502, Statistique Canada). Une description complète et une définition du contenu de chaque code de marchandise figurant dans cette classification se trouvent dans les Vol. I, II, III (cf. catalogue nos 12-521, 12522 et 12523, Statistique Canada) de la *Classification des marchandises d'exportation*.

4. **Pays et région de destination:** Les exportations sont classées selon le pays vers lequel les marchandises sont consignées au moment de leur départ du Canada, soit la destination la plus éloignée connue. Les données statistiques sont compilées et présentées pour chaque pays mentionné à la page IX de la présente publication. Les pays sont disposés surtout selon leur situation géographique, mais ils sont également répartis d'après leur affiliation à des groupes commerciaux et selon leurs accords tarifaires (par ex. les pays de la C.E.E., les pays du Commonwealth, et ceux qui jouissent d'un tarif préférentiel). Dans les statistiques qui figurent dans la présente publication, *la Communauté économique européenne n'inclut pas le Danemark, l'Irlande et le Royaume-Uni, nouveaux membres depuis le 1er janvier 1973.*

5. **Quantities:** Tables 4 and 5 show quantities, where available, in terms of the units specified for each class in the «Export Commodity Classification, Vol. I» (cf. above), and defined on page VII of this report. Table 10 shows quantities only where all or (substantially all) of the classes in a group use the same measure of quantity. Measures of weight or volume exclude any packing required for shipment; and numbers refer to complete (or substantially complete) units exported, excluding parts.

6. **Valuation:** Export documents define the value to be reported as «f.o.b. (free on board) place of lading», i.e. at the point of production for the majority of commodities. In the case of grain, oil seeds and iron ore, however, valuation is f.o.b. Vancouver or St. Lawrence ports. Exports are compiled in Canadian dollars, following conversion of any values denominated in foreign currency. All values in this report are presented in thousands of dollars, after appropriate rounding. Where the current or cumulative amount is less than $500, only quantity may be published for the country concerned. On account of rounding individually, differences may arise between totals and sums of components.

7. **Abbreviations:** Designations of countries and commodities used in this report are often abbreviated or shortened. A key to abbreviations of countries appears on page VIII of this report and comprehensive descriptions of commodities and commodity groups are shown in the «Export Commodity Classification, Vol. I. », (cf. above). The letters «n.e.s.» mean «not elsewhere specified».

8. **Treatment of Confidential Information:** It is occasionally necessary to withhold publication of details where commodity or country information is known to involve disclosure. The suppression of commodity-by-country detail, however, affects neither class nor country totals.

9. **Mode of Transport:** Four principal modes of transport are covered in this report:

   a. Water Transport (includes ship and barge)

   b. Road Transport (includes truck, car and bus)

   c. Rail Transport (includes railway express, even if the express company has moved the goods by road)

   d. Air Transport (includes air express but not air mail)

   A fifth designation 'Other' covers such movements as pipeline, mail and parcel post and other miscellaneous modes of transport.

5. **Quantités:** Les tableaux 4 et 5 donnent, lorsqu'elles sont disponibles, les quantités exprimées dans l'unité indiquée pour chaque catégorie dans la *Classification des marchandises d'exportation*, Vol. I (mentionnée ci-dessus); les unités sont définies à la page VII de la présente publication. Le tableau 10 indique les quantités seulement là où toutes (ou presque toutes) les catégories d'un groupe utilisent la même mesure de quantité. Les poids ou les volumes sont mesurés nets de l'emballage nécessaire à l'expédition; et les nombres représentent le nombre d'articles complets (ou presque complets) exportés sans les pièces.

6. **Valeurs:** Les documents d'exportation définissent la valeur à déclarer, par ex. «f. à b. (franco à bord), lieu de chargement»; c'est-à-dire la valeur au lieu de production pour la plupart des marchandises. En ce qui concerne les céréales, les graines d'oléagineux et le minerai de fer, toutefois, la valeur est f. à b. aux ports de Vancouver ou du St-Laurent. Les exportations sont indiquées en dollars canadiens, après conversion de toute valeur en monnaie étrangère. Toutes les valeurs qui paraissent dans le présent rapport sont indiquées en milliers de dollars, après avoir été arrondies. Lorsque la valeur cumulative ou courante est inférieure à $500, seule la quantité peut être publiée pour le pays concerné. Etant donné que l'on a arrondi chaque valeur, il est possible que les totaux ne correspondent pas aux sommes des éléments constitutifs.

7. **Abréviations:** Les noms des pays et des marchandises cités dans le présent rapport sont souvent abrégés ou raccourcis. L'explication des abréviations des pays est donnée à la page IX du présent rapport tandis que les descriptions complètes des marchandises et des groupes de marchandises figurent dans la *Classification des marchandises d'exportation*, Vol. I, (mentionnée ci-dessus). Les lettres «n.d.a.» signifient «non désigné ailleurs».

8. **Renseignements confidentiels:** Il est parfois nécessaire de supprimer le détail des données relativement à certaines marchandises ou à certains pays pour protéger le caractère confidentiel de données individuelles. La suppression du détail des marchandises par pays ne modifie toutefois pas les totaux par catégorie, ou groupe de pays.

9. **Mode de transport:** Quatre principaux modes de transport sont compris dans le champ du présent rapport:

   a. Le transport par eau (comprend navires et chalands)

   b. Le transport par route (comprend camions, voitures et autobus)

   c. Le transport par chemin de fer (comprend les messageries, même si le service de messageries a transporté les marchandises uniquement par voie routière)

   d. Le transport par avion (comprend les messageries aériennes, mais non le courrier aérien)

   Une cinquième désignation (Autres) comprend les pipe-lines, le courrier, les colis postaux et les divers autres modes de transport.

## CLASSIFICATION OF COUNTRIES

For any country the area included coincides with the geographical area of the country unless otherwise stated; that is, the area includes both the customs area of the country and also any free zones or free areas in which customs control may not be exercised. Countries with which Canada's trade is small are grouped with contiguous or related areas.

## CLASSIFICATION DES PAYS

Sauf indication contraire, le territoire englobé par un pays quelconque correspond exactement aux limites géographiques du pays en question, c'est-à-dire qu'il comprend aussi bien le territoire douanier du pays que toute zone franche ou tout territoire franc sans contrôle douanier. Les pays avec lesquels les échanges commerciaux du Canada sont peu importants ont été regroupés avec un territoire adjacent ou apparenté.
